

Washing automates Toploader Stability – drain level 2 meters

1. Stability

Complaint:

Washing appliance is moving during the washing program, poor stability.

Measure:

When the customer does not have to move the appliance or the customer agrees, it is possible to assemble two feet to the runners in the base at the rear side.

In doing so press two inserts no. 124 565 910/5 into the assigned hex holes next to the runners.

Afterwards screw in the feet no. 126 041 710/8 with the fixing washers no. 124 046 403/0.

Align the appliance.

2. Drain level 2 meters

The producer guarantees a drain level of 1 m. For a drain level of 2 m the drain pump no. 400 604 132/3 can be assembled.
