

ARE YOU FULLY CHARGED?

THE INTELLIGENT EBC WATERPROOF CHARGER

EXIDE®

THE FIRST NAME IN BATTERIES

Today's modern vehicles have more electrical equipment than ever before!

- **Cars and Vans:** Heated seats, CD players, ACC/Climate Control, GPS
- **Boats:** GPS, Navigation equipment, Radar
- **Caravans:** TV/Video, Radio, Refrigerator, Coffee maker

This results in a heavy amount of drain on the battery. Often the distance travelled each day is not enough to recharge the battery to its required level by using the on board charging system.

PRODUCT FACTS

THE INTELLIGENT EBC WATERPROOF CHARGER (Art no: 01715)

Technical data

Input voltage AC: 220-240V

Dimensions: 140x95x135 mm (LxWxH)

Weight: 1,8 kg

Max voltage: 14,4V

Charge current: 5A

Charging
Characteristics: IU

Lamps:
Yellow = Charge in progress
Green = Battery charged
Red = Charger not connected correctly

Voltage Drain: None

Classification: IP67, the charger can be submerged in water and is not sensitive to condensation

For more information please read the label on the back of the charger.

Features:

- Waterproof (Hermetically Sealed)
- Intelligent
- Voltage controlled, no risk for overcharge
- Fixing bracket enables the charger to be secured anywhere
- Maintenance charge
- No risk for voltage drain

Benefits

- Can be used indoors or outdoors, on land or sea
- Minimizes the risk of explosion due to the controlled voltage limit 14,4V
- The battery can be left on charge over long periods of time without risk for damage
- Safe to use whatever the weather conditions

Where can the charger be used:

- Cars and Vans
- Boats
- Caravans
- Summer cottages
- 4WD
- Car showrooms

The charger can be used on all open vented lead acid batteries from 15 Ah to 75 Ah.

Backview

The fixing bracket enables the charger to be secured anywhere.
