Getting Started

Conventions Used in the Guide

Pay Special Attention: Instructions that are important to remember and may prevent mistakes.

Caution: Information that, if not followed, may result in damage to the product.

Safety Precautions

The following precautions should be observed in handling the speaker described in this guide:

Place the speakers on a flat, level and stable surface.

Do not place the speakers in environments subject to mist, smoke, vibration, excessive dust, salty or greasy air, or other corrosive gases and fumes.

Do not drop or jolt the speakers.

Do not allow anything to drop into the subwoofer case through its ventilator, as it could result in fatal electric shock or fire.

Place the unit far enough from other equipments for good heat dissipation.

Do not perform any maintenance with wet hand.

Prevent foreign substance, such as water, other liquids or chemical, from entering the speakers while performing maintenance procedures on the speakers.

Chapter 1. How to Handle Defective Returns

1.1 Overview

1.2 Problems

Item	<u>Problem Description</u>
1.2.1	No power, LED (indicator)
1.2.2	No sound
1.2.3	Front channel no sound (including either FR or FL no sound)
1.2.4	Rear channel no sound (including either RR or RL no sound)
1.2.5	Center no sound
1.2.6	Woofer no sound
1.2.7	input no sound
1.2.8	Remote control no use
1.2.9	Noise
1.2.10	LED indicators no light

*Attention

Please follow the numbered sequence marked within parenthesis given in individual Flow chat in that this is the best-recommended sequence to rectify the problems.

1.2.1 No power, LED (indicator) unlighted

1.2.2 no sound

1.2.3 Front channel no sound (including either FR or FL no sound)

1.2.4 Rear channel no sound (including either RR or RL no sound)

1.2.5 Center no sound

1.2.6 Woofer no sound

1.2.7 input no sound

1.2.8 Remote control no use

1.2.9. Noise

1.2.10. LED indicators no light

Problem	LED indicators no light Defective , dry-soldering, or broken LED1, LED2, LED3, LED4, LED5, LED6 or the components relating to them Check and replace
Analyze and identify the causes	
Solutions	

Chapter 2. Specifications

Satellite

NO	DESCRIPTION	UNIT	NOMINAL					LIMIT
			CEN	FR	FL	SR	SL	
1	RATED OUTPUT POWER @THD 10%	W	18	18	18	18	18	±5%

8	rubber foot mat, 14mm*2mm	EP73060003
9	Red/black terminal, H-WP2-8	EP1A090065

Chapter 6. Important Notes

6.1 Packing requirement for sending the PCB assembly by post

PCB assembly is a kind of sophisticated electronic circuit board. Well packing will be required when sending them by post.

*Some sophisticated IC components are mounted on the PCB assembly; hence it is necessary to pack each PCB assembly with a separate static protecting bag, in order to avoid static electricity.

*Reliable external packing is also very important when sending the PCB assembly by post, in that it would avoid unnecessarily lost or damage.

6.2 Short of spare parts while repairing a speaker system

If you are short of spare parts when you have some speaker systems waiting to be repaired, it would be recommended to take the necessary parts from one

Speaker system, so that you may have the as many speaker systems
